Kieron **Morris**

To me technology in general is fascinating, and has become somewhat of a passion; the idea that devices that fit on our desks, laps or even Pockets can access and store such a vast quantity of information has always astounded me, and as such, I have spent years and many man-hours expanding what started as a little seed of curiosity into what I consider to be a very vast and functional skill-set that serves a purpose in both my free time and professional career; developing, testing and interfacing with applications that provide valuable information to the user and the networks that support them.

When it comes to IT I consider myself a dedicated, forward-looking individual. I thrive on innovation, change and challenge and love working alone, or in a team on non-stagnant projects that involve customer input with a view to results of a high standard.

SKILLS

Programming Languages

JAVA
+ Skillset learnt through on the job training, university & home projects.
Extensively used in a professional context as part of a development team.
Developed for Linux

DELPHI/OBJECT-PASCAL/FREEPASCAL
+ Experience gained through home projects & Open-Source software.

ASP

+ Used on a project as part of college work.

Shell/CLI
Languages

BASH

+ Skillset learnt through the continued Setup, Maintenance & Administration
  of Linux/Unix servers both in a professional and home setting.

BATCH

+ General Skillset picked up due to day-to-day use of Windows Systems.

POWERSHELL

+ Skillset learnt through work related Administration & Capabilities
  Development.

SQL

+ Used widely across many projects for interfacing with MySQL & SQL-Lite
  databases.

OPEX

+ Interpreted language developed collaboratively by myself and a few
  acquaintances for a bespoke system.

SLL

+ Esoteric language developed in my free time for fun.

Computers/Networking

SQL SERVER ADMINISTRATION/CONFIGURATION
+ Widely utilized skillset, across many projects in both a professional and personal setting.

LINUX ADMINISTRATION
+ Skillset learnt through University, Home Learning/Personal Development and used widely throughout my professional career.

WINDOWS/WINDOWS SERVER ADMINISTRATION
+ Experience gained through College, Home Learning/Personal Development - used widely throughout my professional career.

BINARY ANALYSIS (MOSTLY STATIC/DEAD-LISTING)
+ Performed binary analysis using IDA-Pro & OllyDBG from time-to-time as part of my role in a professional environment.

NETWORK SECURITY, FORENSICS & PENETRATION TESTING
+ Competence achieved through Personal Development at home, University, and application in a professional environment.

RELATIONAL DATABASE ANALYSIS AND DESIGN
+ The ability to interface with, create, manage and design relational databases was achieved through a mix of; College, University, on the job training and self-learning at home.

SOFTWARE DEPLOYMENT
+ Skillset learnt whilst in a professional setting.

Office

MICROSOFT OFFICE SUITE & OPEN/LIBRE ALTERNATIVES
+ High degree of comfort with the Microsoft Office software suite and open-source alternatives, including macros written in VBScript for extending functionality.
+ Proficiency in; Excel, Word, Access, Project & Publisher.
+ Extensive experience with Open/Libre alternatives running on both Linux & Windows.

Misc.

MUSIC PRODUCTION
+ I started music production as a hobby in my free time, and although I am still very much a novice, I enjoy the challenge, especially when it comes down to the technicalities behind signals theory.

SWIMMING
+ I consider myself a fairly strong swimmer, having attended many clubs over the years and helped run a club teaching life-saving to children.
